$$\text{fraction} = \frac{4}{7} = \frac{\text{numerator}}{\text{denominator}}$$

A fraction can be viewed as dividing a pie up into pieces and eating some of those pieces.

Let's consider the following fraction.

$$\frac{3}{8}$$

How many pieces of the pie are left? Let's take a look at the fraction.

$$\frac{3}{8} = \frac{\text{numerator}}{\text{denominator}}$$

The *denominator* tells you how many pieces to cut the pie into. The *numerator* tells you how many pieces are left.

The *denominator* = 8 = cut the pie into 8 pieces. The *numerator* = 3 = number of pieces of pie left.

Draw the fraction of the pie. Colour in the pieces.
